

Overview of Early Learning Centre

Introduction

The Minaret College Early Learning Centre provides an exceptional kinder service for children aged between 3 and 5 years of age. At this age, children are eager learners and possess a natural curiosity about the world around them.

In these years, our focus is on the holistic development of children through play-based learning and diverse forms of expression. Our approach aligns with Islamic values and principles, nurturing physical, social, emotional, and spiritual wellbeing while maximizing academic capabilities. Educators support children's optimal learning using the National Early Years Learning Framework.

Our Approach

At Minaret Early Learning Centre, we believe in an education that is in harmony with the nature of the child and aligns with our Islamic values and principles. We believe in developing our children's physical, social, emotional and spiritual wellbeing and maximising their academic capabilities while keeping true to the Islamic tradition of leaving children to play for the first seven years of their life.

We believe children need the opportunity to express themselves in a wide variety of ways, through drawing, painting, construction, and play. Our objective is to provide positive opportunities for child development. Educators support children to meet their optimum learning capacity through the use of the National Early Years Learning Framework.

Our Curriculum

Islamic education is an integral part of our curriculum. This strong foundation is core to our program and helps children to develop a positive self-identity and a sense of belonging in the Muslim and broader community. Activities throughout the week include Qur'an and Islamic studies and children celebrate important celebrations such as Ramadan and Eid.

We understand our important role is to provide engaging experiences that promote children's social, emotional, physical, and language skills that are based around the child's voice, their interests, and our observations. We support and encourage logical inquiry and mathematical thinking, creativity, literacy and an appreciation for our natural environment for a sustainable future, with a focus on providing a holistic program for each child.

Our Approach to Learning

Minaret College's approach to learning throughout a child's schooling years is rooted in Islamic values and principles. It nurtures the physical, social, emotional, and spiritual wellbeing of each student.

Schools are dedicated to specific year levels and address the needs of children as they journey through life's unique development stages. Our curriculum and approach provide opportunities for all students to explore their interests and develop skills, all within a supportive and respectful learning environment.
